Salmon Fishing School - Fishing Tactics and Strategies

Join Göran and learn from his vast experience from over 50 years of full season salmon fishing. You will learn:

- how to cast and to act at the river
- to read the water and find out where the salmon stops and stays under all water conditions
- how the surroundings, weather and light tell you when is the best time to fish, were the holding places are and which fly would work best at that specific situation

During the week salmon fishing and theory will be mixed with practicing fly casting. We stay in an old style Norwegian farmhouse. It has plenty of bedrooms, a kitchen, two living rooms, sanitary facilities and a room equipped for drying waders and wading boots.
